Gianetti 38.50 M Aluminium motoryacht Asking Price 13.500.000 € Ex Vat

The fully custom-built GIANETTI CUSTOM YACHTS 38M MIRAGE is a 125' tri-deck and all-aluminium motor yacht, under construction at Viareggio, which could be ready for delivery for savvy yachtsmen in 8 months. The GIANETTI CUSTOM YACHTS 38M MIRAGE is the second hull in the series, conceived and built with no compromise in quality and options.

With an all-aluminium hull and superstructure (light alloy), the GIANETTI CUSTOM YACHTS 38M MIRAGE boasts modern and masculine exterior lines and a voluminous interior, accommodating 10 guests in 5 luxurious staterooms, that can still be customised by her new owner.

The GIANETTI CUSTOM YACHTS 38M MIRAGE features spacious deck areas throughout her three decks including sunbathing platforms on the bow and the sundeck, a Jacuzzi, and a wetbar.

This new construction 125' Gianetti Superyacht benefits from the craftsmanship experiences and facilities of the former Gianetti and Benetti Sail Division yards combined with a new engineering and design team at CLM Viareggio and Tommaso Spadolini.

Currently 70% through the yacht build process, this new construction aluminium Superyacht offers a unique opportunity to purchase a new build that can be customized to your own style and delivered in 8 months from order. Although the layout of the yacht is fixed there is plenty of opportunity for customization and bespoke design of the interior. The full-beam bridge deck Owner's suite is a stand-out feature with the option of a private Owners deck.

Designed to comfortably sleep 10 guests with three generous decks, the individual design offers a luxurious sense of space. The hull and propulsion have been optimised for the full range of most frequently used speeds (10-14 knots) in displacement mode.

Beautifully crafted, elegantly designed and highly engineered, the GIANETTI CUSTOM YACHTS 38M MIRAGE has been designed and custom built combining Italian style and flair with Northern European build quality, the unique 38.35m, wide-body aluminium displacement hull seamlessly fuses pioneering technology and engineering with a contemporary design.

This new construction project is near completion, yet she can still be tailored to suit the needs and demands of any discerning client.
