172’ 7” Sanlorenzo 52 Steel Superyacht for Sale.

Built for a highly experienced Owner in 2018, this 172’ 7” luxury SANLORENZO 52 STEEL Superyacht for sale, has been crafted on a steel displacement hull, with light aluminium alloy superstructure, with the utmost thought and precision.

The yacht recently successfully completed her 5-year class survey and is the yard’s finest showcase of performance and technology with features, certifications and extras that have not been granted to any other model since her build.

Forward thinking technical innovations meet large internal volumes and serene outdoor spaces aboard this SANLORENZO 52 STEEL motor yacht, with an extensive use of glass encapsulating the reflective properties of the ocean. Her floating tender garage floods to allow the tender to enter and exit with ease, and when not in use, the floor lowers securely to resume use as part of the expansive beach club, with fold-down terraces opening to port and starboard.

Created with unmatched low noise and vibration levels due to high levels of insulation and build strategies, this is the only Sanlorenzo yacht built to ABS “Comfort (Y)” class. Her paint work is only three years old after being re-done under warranty, and she has had the same Captain and core crew from build. Additionally, she comes with all services, inspections and maintenance up to date and complete.

The overall beach club arrangement, including hatches in the side doors, is far superior to newer models and becomes truly weatherproof when in place. Unique feature in the SANLORENZO 52 STEEL series is that she was extended from build to be almost 53 metres, with a lengthened swim platform allowing for more space for tender operations, and the aft has strengthened bollards designed for ‘stern to’ and ‘rock’ moorings.

Natural light fills the beach club from the glass-bottom pool above on the main deck, instilling a sense of calm throughout the area. When in position, the beach club features freestanding furniture and a bar area, forward of which is a large and well-equipped gymnasium, complete with Technogym equipment. Aft of the beach club is the spacious swim platform, which can be further extended with inflatable platforms.

This SANLORENZO 52 STEEL striking exterior was designed by Officina Italiana Design under the careful guidance of founder Mauro Micheli, while her interior design is by Tiziana Vercellesi, the combination of which earnt her a place as finalist of the prestigious Boat International Design & Innovation Awards in 2019.

Accommodating up to 14 guests in 6 contemporary and versatile en-suite staterooms, she radiates tranquillity, class and sophistication, with a range of innovative features resulting in the ultimate seafaring haven, and featuring the full-beam Owner's suite forward on the main deck.

Her interior design and outfitting is truly class leading and a benchmark for what Sanlorenzo can deliver. With leather, parquet, marbles, silk wallpaper, ebony amaro veneers, mother of pearl inlays, and crystal handles throughout the guest interior, complemented by loose furniture from Fendi, including sofas, chairs and cushions in both the interior and exterior.

The yacht also accommodates up to 11 crew members, more than the standard 9, in 5 well-appointed cabins, including the separate Captain's cabin on the bridge deck, ensuring the ratio of crew to guests is unparalleled and that service is always second to none on board.

Below deck, the engineering systems were upgraded from build including dramatic noise and vibration reduction measures, reducing them to unrivalled levels. Other standout features include increased generator capacity, cold/sparkling water production, AVIT upgrades including 5G, TVRO and Starlink, have been continually upgraded and integrated on board, along with improving the TVs and speakers.

LED lighting on the exterior and hull of the yacht illuminate the vessel distinctively in any anchorage, complementing her surrounding underwater lights.

Powered by twin 2012 Hp MTU Diesel engines, this SANLORENZO 52 STEEL reaches a maximum speed of 18 knots and comfortably cruises at 12 knots for a maximum range of 4,000 nautical miles. She is, of course stabilized both underway and at anchor.

With an impressive list of customised upgrades and specifications, she is also VAT paid and comes with a luxury 7.5 metre limousine tender, uniquely fitted with Bentley lights, presenting

a wonderful opportunity for her next Owner to acquire something truly unique and in turn-key condition.
